TITLE : WORKING GLOVE AND METHOD FOR
PRODUCING THE SAME

ABSTRACT : PROBLEM TO BE SOLVED: To obtain soft, readily usable, easily producible, and even environmentally-friendly working gloves having good quality in appearance and to provide a method for producing the working gloves.

SOLUTION: These gloves are produced by mounting each knitted fabric glove 1 on a flat platy hand model 4, setting the flat platy hand model 4 on a metal mold 5 for coating, coating both the palm part and the back part of the knitted fabric glove 1 with a foam latex 2, unmolding the knitted fabric glove 1 from the mold, then mounting the resultant knitted fabric glove 1 on a hand model 9 for three-dimensional molding, and heat-curing the foam latex 2. A rubber sheet 3 is bonded on the top surface of the foam latex 2 or the knitted fabric glove 1 is dipped in a latex solution.
